Status	Finished
Started	Friday, 6 March 2026, 2:30 PM
Completed	Friday, 6 March 2026, 2:55 PM
Duration	25 mins 15 secs
Grade	11.50 out of 15.00 (76.67%)

Question 1

Correct

Mark 1.00 out of 1.00

[Flag question](#)

Which of the following is associated with objects?

- ☐ a. State
- ☐ b. Behavior
- ☐ c. Identity
- ☒ d. All of the above ✓

Your answer is correct.

The correct answer is: All of the above

Question 2

Correct

Mark 1.00 out of 1.00

[Flag question](#)

What is the use of final keyword in Java?

- ☐ a. When a class is made final, a subclass of it cannot be created.
- ☐ b. When a method is final, it cannot be overridden.
- ☐ c. When a variable is final, it can be assigned value only once.
- ☒ d. All of the above ✓

Your answer is correct.

The correct answer is: All of the above

Question 3

Correct

Mark 1.00 out of 1.00

[Flag question](#)

Which of the following is FALSE about abstract classes in Java

- ☐ a. If we derive an abstract class and do not implement all the abstract methods, then the derived class should also be marked as abstract using 'abstract' keyword
- ☐ b. Abstract classes can have constructors
- ☐ c. A class can be made abstract without any abstract method
- ☒ d. A class can inherit from multiple abstract classes. ✓

Your answer is correct.

The correct answer is: A class can inherit from multiple abstract classes.

Question 4

Correct

Mark 1.00 out of 1.00

[Flag question](#)

Which of the following statements about constructors in Java is true?

- I. Constructors are used to create objects of a class.
- II. Constructors have a return type.
- III. A class can have multiple constructors with different parameter lists.
- IV. Constructors can be inherited from a superclass.

- ☒ a. I,III ✓
- ☐ b. I,II,III
- ☐ c. I,II,III,IV
- ☐ d. II,III,IV

Your answer is correct.

The correct answer is: I,III

Question 5

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

Which of the following is true about interfaces in java.

- 1) An interface can contain following type of members.
- a. public, static, final fields (i.e., constants)
- b. default and static methods with bodies
- 2) An instance of interface can be created.
- 3) A class can implement multiple interfaces.
- 4) Many classes can implement the same interface

- ☐ a. 1,3 and 4
- ☒ b. 1,2 and 4 ✗
- ☐ c. 2,3 and 4
- ☐ d. 1,2,3, and 4

Your answer is incorrect.

The correct answer is: 1,3 and 4

Question **6**
Correct
Mark 1.00 out of 1.00
[Flag question](#)

Which of the following is incorrect?

X: this() is used to invoke a constructor of the same class.
Y: super() is used to invoke a superclass constructor.

- ☐ a. X Only
- ☐ b. Y Only
- ☒ c. Both are Correct ✓
- ☐ d. Both are Incorrect

Your answer is correct.

The correct answer is: Both are Correct

Question **7**
Correct
Mark 1.00 out of 1.00
[Flag question](#)

Give the below code. Predict the output.

```
class Test{
    static int a;
    static{
        a = 4;
        System.out.println ("inside static block"); System.out.println ("a = " + a);
    }

    Test () {
        System.out.println ("inside constructor"); a = 10;
    }

    public static void func() { a = a + 1;
        System.out.println ("a = " + a);
    }

    public static void main(String[] args){ Test obj = new Test();
        obj.func();
    }
}
```

- ☒ a. inside static block ✓
a = 4
inside constructor
a = 11
- ☐ b. Compilation Fails
- ☐ c. Runtime Error
- ☐ d. inside static block a = 4
inside constructor a = 5

Your answer is correct.

The correct answer is: inside static block

a = 4
inside constructor
a = 11

Question **8**
Correct
Mark 1.00 out of 1.00
[Flag question](#)

Which option defines a well-encapsulated class?

- ☐ a. class Template {
public String font;
}
- ☐ b. class Template2 {
public String font;
public void setFont(String font) { this.font = font;
}

public String getFont() {

return font;
}
}
- ☐ c. class Template3 {
private String font; public String author;
public void setFont(String font) { this.font = font;
}
public String getFont() { return font;
}
public void setAuthor(String author) { this.author = author;
}
public String getAuthor() { return author;
}
}
- ☒ d. None of the above ✓

Your answer is correct.

The correct answer is: None of the above

Question **9**

Predict the Output

Predict the Output.

```
public class Test {  
    public static void main (String [] args) { Test a = new Test (); System.out.println(isAvailable +  
        " "); isAvailable = Test.doStuff(); System.out.println(isAvailable);  
    }  
    public static boolean doStuff () {  
        return !isAvailable;  
    }  
    static boolean isAvailable = false;  
}
```

- ☐ a. true false
- ☒ b. false true ✓
- ☐ c. true true
- ☐ d. true false

Your answer is correct.

The correct answer is: false true

Examine the following code and select the correct options:

```
class EJava {  
    public EJava() {  
        this(7); System.out.println("public");  
    }  
    private EJava(int val) {  
        this("Sunday"); System.out.println("private");  
    }  
    protected EJava(String val){  
        System.out.println("protected");  
    }  
}  
class TestEJava {  
    public static void main(String[] args) { EJava eJava = new EJava();  
    }  
}
```

- ☒ a. The class EJava defines three overloaded constructors. ✓
- ☐ b. The class EJava defines two overloaded constructors. The private constructor isn't counted as an overloaded constructor.
- ☐ c. Constructors with different access modifiers can't call each other.
- ☐ d. The code prints the following:
protected
private
public
- ☐ e. The code prints the following:
public
private
protected

Your answer is partially correct.

You have correctly selected 1.

The correct answers are: The class EJava defines three overloaded constructors., The code prints the following:

protected
private
public

What is the output of the following code?

```
class Animal {  
    void jump() {  
        System.out.println("Animal");  
    }  
}  
class Cat extends Animal { void jump(int a) {  
    System.out.println("Cat");  
}  
}  
class Rabbit extends Animal { void jump() {  
    System.out.println("Rabbit");  
}  
}  
class Circus {  
    public static void main(String args[]) { Animal cat = new Cat(); Rabbit rabbit = new Rabbit();  
        cat.jump();  
        rabbit.jump();  
    }  
}
```

- ☒ a. Animal ✓
Rabbit
- ☐ b. Cat
Rabbit
- ☐ c. Animal

Animal

☐ d. None of the above

Your answer is correct.

The correct answer is: Animal
Rabbit

Question **12**

Correct

Mark 1.00 out of 1.00

[Flag question](#)

Examine the following code: class Programmer {

```
void print() {  
    System.out.println("Programmer - Mala Gupta");  
}  
  
class Author extends Programmer { void print() {  
    System.out.println("Author - Mala Gupta");  
}  
}  
  
class TestEJava {  
    Programmer a = new Programmer();  
    // INSERT CODE HERE  
    a.print();  
    b.print();  
}
```

Which of the following lines of code can be individually inserted at //INSERT CODE HERE so that the output of the code is as follows?

Programmer - Mala Gupta

Author - Mala Gupta

- ☐ a. Programmer b = new Programmer();
- ☒ b. Programmer b = new Author(); or Author b = new Author(); ✓
- ☐ c. Author b = new Programmer();

Your answer is correct.

The correct answer is: Programmer b = new Author(); or Author b = new Author();

Question **13**

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

What is the output of the following code?

```
class Paper {  
    Paper() {  
        this(10); System.out.print("Paper:0");  
    }  
    Paper(int a) {  
        System.out.print("Paper:1");  
    }  
}  
  
class PostIt extends Paper {}  
class TestPostIt {  
    public static void main(String[] args) { Paper paper = new PostIt();  
}  
}
```

- ☐ a. Paper:1
- ☐ b. Paper:0
- ☒ c. Paper:0 Paper:1 ✗
- ☐ d. Paper:1 Paper:0

Your answer is incorrect.

The correct answer is: Paper:1 Paper:0

Question **14**

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

What is the output of the following code?

```
class Diary {  
    int pageCount = 100; int getPageCount() {  
        return pageCount;  
    }  
    void setPageCount(int val) { pageCount = val;  
    }  
}  
  
ClassRoom {  
    public static void main(String args[]) { System.out.println(new Diary().getPageCount()); new  
        Diary().setPageCount(200); System.out.println(new Diary().getPageCount());  
    }  
}
```

- ☒ a. 100 200 ✗
- ☐ b. 100 100
- ☐ c. 200 200
- ☐ d. The code fails to compile

Your answer is incorrect.

The correct answer is: 100 100

Question **15**

Correct
Mark 1.00 out of 1.00
[Flag question](#)

what is the output of the following code?

```
class Phone {  
    void call() {  
        System.out.print("Call-Phone");  
    }  
}  
  
class SmartPhone extends Phone{ void call() {  
    System.out.print("Call-SmartPhone");  
}  
}  
  
class TestPhones {  
    public static void main(String[] args) { Phone phone = new Phone();  
    Phone smartPhone = new SmartPhone(); phone.call();  
    smartPhone.call();  
}  
}
```

- ☐ a. Call-Phone Call-Phone
- ☒ b. Call-Phone Call-SmartPhone ✓
- ☐ c. Call-Phone null
- ☐ d. null Call-SmartPhone

Your answer is correct.

The correct answer is: Call-Phone Call-SmartPhone
