Question 1

Complete

[Flag question](#)

A software testing tool reads HTTP response bodies as strings. Which method should the SDET use to compare two response strings in a case-insensitive manner without throwing an exception even if one of them is null?

- ☐ 1. response1 == response2
- ☐ 2. response1.equals(response2)
- ☐ 3. response1.equalsIgnoreCase(response2)
- ☒ 4. "expected".equalsIgnoreCase(response1)

Your answer is correct.

Question 2

Complete

[Flag question](#)

What is the output of the following code?

```
class EJavaGuruString2 {  
    public static void main(String args[]) {  
        String ejg = "game".replace("a", "Z").trim().concat("Aa"); ejg.substring(0, 2);  
        System.out.println(ejg);  
    }  
}
```

- ☐ 1. gZmeAZ
- ☒ 2. gZmeAa
- ☐ 3. gZm
- ☐ 4. gZ e game

Your answer is correct.

Question 3

Complete

[Flag question](#)

What is the output of the following code?

```
StringBuilder sb = new StringBuilder("Developer");  
sb.delete(3, 6).insert(3, "--").reverse();  
System.out.println(sb)
```

- ☒ 1. rep--veD
- ☐ 2. Devper--
- ☐ 3. Dev--per
- ☐ 4. reP--ved

Your answer is correct.

Question 4

Complete

[Flag question](#)

1. What will be the output of the below program?

```
public class Test {  
    public static void main (String[] args) { String s1 = null; System.out.println(s1); //line 2  
    System.out.println(s1.toString()); //line 3  
    }  
}
```

- ☐ 1. null null
- ☒ 2. null NullPointerException
- ☐ 3. NullPointerException NullPointerException
- ☐ 4. None

Your answer is correct.

Question 5

Complete

[Flag question](#)

Consider the following program:

```
public class StrEqual {  
    public static void main(String[] args) { String s1 = "hello";  
        String s2 = new String("hello"); String s3 = "hello";  
        if (s1 == s2) {  
            System.out.println("s1 and s2 equal");  
        } else {  
            System.out.println("s1 and s2 not equal");  
        }  
        if (s1 == s3) {  
            System.out.println("s1 and s3 equal");  
        } else {  
            System.out.println("s1 and s3 not equal");  
        }  
    }  
}
```

```
System.out.println("s1 and s3 equal");
} else {
System.out.println("s1 and s3 not equal");
}
}
}
```

Which one of the following options provides the output for the above program when executed?

- ☐ 1. s1 and s2 equal s1 and s3 equal
- ☐ 2. s1 and s2 equal
s1 and s3 not equal
- ☒ 3. s1 and s2 not equal
s1 and s3 equal
- ☐ 4. s1 and s2 not equal
s1 and s2 not equal

Your answer is correct.

Question **6**

Complete

[Flag question](#)

An API test method calls Integer.parseInt(response) to validate a numeric field. If the API returns "N/A" as the value, which exception is thrown, and what is its hierarchy?

- ☐ 1. ClassCastException — extends RuntimeException
- ☐ 2. InputMismatchException — extends NoSuchElementException
- ☒ 3. NumberFormatException — extends IllegalArgumentException — extends RuntimeException
- ☐ 4. Can be checked or unchecked both

Your answer is correct.

Question **7**

Complete

[Flag question](#)

What is the output of the following Java program?

```
public class Test {
public static void main (String[] args) { int x = 0;
int y = 1; int z = y / x;
}
}
```

- ☐ 1. Compiler Error
- ☐ 2. Compiles and runs fine
- ☒ 3. Compiles fine but throws ArithmeticException exception
- ☐ 4. None of above

Your answer is correct.

Question **8**

Complete

[Flag question](#)

Which of the following is a super class of all exception type classes?

- ☐ 1. Catchable
- ☐ 2. RuntimeExceptions
- ☐ 3. String
- ☒ 4. Throwable

Your answer is correct.

Question **9**

Complete

[Flag question](#)

What is the output of the following code?

```
public static void main(String[] args) { int a = 10;
String name = null; try {
a = name.length(); //line1 a++; //line2 catch (NullPointerException e){
++;
return;
} catch (RuntimeException e){ a--;
return;
} finally {
System.out.println(a);
}
}
```

- ☐ 1. 5
- ☐ 2. 6
- ☐ 3. 10
- ☒ 4. 11

Your answer is correct.

Question **10**

Complete

What is the output of the following code?

```
try { System.out.println("try"); } throw new RuntimeException("try"); catch (Exception e) { System.out.println("catch"); } finally { System.out.println("finally"); }
```

🚩 [Flag question](#)

```
try { System.out.println( try ); throw new RuntimeException( err ); } catch (exception e) { System.out.println( catch ); } finally { System.out.println( finally ); }
```

- ☐ 1. try
- ☐ 2. try catch
- ☒ 3. try catch finally
- ☐ 4. try finally

Your answer is incorrect.

Question **11**
Complete
[🚩 Flag question](#)

What will happen?

```
List list = new ArrayList();  
list.add("10");  
list.add(20);  
for (Object obj : list) {  
    System.out.println((Integer)obj);  
}
```

- ☐ 1. 10 20
- ☐ 2. Compilation error
- ☒ 3. ClassCastException
- ☐ 4. NullPointerException

Your answer is correct.

Question **12**
Complete
[🚩 Flag question](#)

Test Stability Issue

Your test fails randomly due to unordered collection.

Which collection causes this?

- ☐ 1. ArrayList
- ☒ 2. HashSet
- ☐ 3. LinkedList
- ☐ 4. Vector

Your answer is correct.

Question **13**
Complete
[🚩 Flag question](#)

Which is TRUE about Generics?

- ☐ 1. Allows only primitives
- ☒ 2. Ensures type safety
- ☐ 3. Slows performance drastically
- ☐ 4. Cannot be used with collections

Your answer is correct.

Question **14**
Complete
[🚩 Flag question](#)

Choose the correct option based on this program:

```
import java.util.*; class UtilitiesTest {  
    public static void main(String[] args) {  
        List < int > intList = new ArrayList < > (); intList.add(10);  
        intList.add(20);  
        System.out.println("The list is: " + intList);  
    }  
}
```

- ☐ 1. It prints the following: The list is: [10, 20]
- ☐ 2. It prints the following: The list is: [20, 10]
- ☒ 3. It results in a compiler error
- ☐ 4. It results in a runtime exception

Your answer is correct.

Question **15**
Complete
[🚩 Flag question](#)

What are the implementation classes of the List interface?

1. ArrayList
2. HashSet
3. LinkedList
4. Vector

- ☐ 1. 1,2
- ☐ 2. 1,2,4

- ☒ 3. 1,3,4
- ☐ 4. 1,2,3,4

Your answer is correct.
