Question **1**
Correct
Mark 1.00 out of 1.00
Flag question

What is a JIT compiler?

- [x] a. JIT improves the runtime performance of computer programs based on bytecode. ✓
- [ ] b. JIT is an application development framework.
- [ ] c. JIT is an implementation of the Java Virtual Machine which executes Java programs.
- [ ] d. None of the above.

Your answer is correct.
The correct answer is: JIT improves the runtime performance of computer programs based on bytecode.

Question **2**
Correct
Mark 1.00 out of 1.00
Flag question

Method used to take a string as input in Java?

- [ ] a. next()
- [ ] b. nextLine()
- [ ] c. Only A
- [x] d. Both A and B ✓

Your answer is correct.
The correct answer is: Both A and B

Question **3**
Correct
Mark 1.00 out of 1.00
Flag question

What is the output of the below Java program that implements the nesting of loops?

```
int i=1, j=1;
while(i<3){
  do {
    System.out.print(j + ",");
    j++;
  }while(j<4);
  i++;
}
```

- [ ] a. 1,2,3,4,1,2,3,4,
- [x] b. 1,2,3,4, ✓
- [ ] c. 1,2,3,1,2,3,
- [ ] d. 1,2,3,

Your answer is correct.
The correct answer is: 1,2,3,4,

Question **4**
Correct
Mark 1.00 out of 1.00
Flag question

Arrays in Java are

- [x] a. Objects ✓
- [ ] b. Object References
- [ ] c. Primitive types
- [ ] d. None

Your answer is correct.
The correct answer is: Objects

Question **5**
Correct
Mark 1.00 out of 1.00
Flag question

1. Consider the following object declaration statement
Scanner obj= new Scanner(System.in);
What is the System.in this declaration?

- [ ] a. Class which points input device
- [x] b. Reference to Input stream ✓
- [ ] c. Reference to Computer System
- [ ] d. None of these

Your answer is correct.
The correct answer is: Reference to Input stream

Question **6**
Correct
Mark 1.00 out of 1.00
Flag question

The break statement causes an exit from _____ loop.

- [x] a. Innermost ✓
- [ ] b. Outermost
- [ ] c. break statement causes an exit from the program
- [ ] d. Depends on the program

Your answer is correct.
The correct answer is: Innermost

Question **7**
Correct
Mark 1.00 out of 1.00
Flag question

What will be the output for the code?

```
public class Main{
        public static void main(String[] args) {
                int arr1[] = {1, 2, 3};
                int arr2[] = {1, 2, 3};
                if (arr1 == arr2)
                        System.out.println("Same");
                else
                        System.out.println("Not same");
        }
}
```

- [ ] a. Same
- [x] b. Not same ✓
- [ ] c. Compilation Error
- [ ] d. None of the above

Your answer is correct.
The correct answer is: Not same

Question **8**
Correct
Mark 1.00 out of 1.00
Flag question

Which type of casting is lossy in Java?

- [ ] a. Widening typecasting
- [x] b. Narrowing typecasting ✓
- [ ] c. Manual typecasting
- [ ] d. All of these

Your answer is correct.
The correct answer is: Narrowing typecasting

Question **9**
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is FALSE about arrays on Java?

- [ ] a. A Java array is always an object
- [x] b. The length of the array can be changed after the instantiation of array ✓
- [ ] c. Arrays in Java are always allocated on heap
- [ ] d. Array elements can be accessed even randomly

Your answer is correct.
The correct answer is: The length of the array can be changed after the instantiation of array

Question **10**
Correct
Mark 1.00 out of 1.00
Flag question

What will be the output for the code?

```
class Main {
public static void main(String args[]) {
    System.out.println(fun());
}

int fun()
{
return 20;
}
        }
```

- [ ] a. 20
- [x] b. compiler error ✓
- [ ] c. 0
- [ ] d. garbage value

Your answer is correct.
The correct answer is: compiler error
