Completed	Monday, 30 March 2026, 2:50 PM
Duration	9 mins 57 secs
Marks	80.00/100.00
Grade	**8.00** out of 10.00 (**80**%)

Question **1**
Correct
Mark 10.00 out of 10.00
Flag question

Which of the following SQL commands is used to permanently remove a table along with all its data and structure from the database?

1. DELETE TABLE employees;
2. REMOVE TABLE employees;
3. DROP TABLE employees; ✓
4. TRUNCATE TABLE employees;

Your answer is correct.
The correct answer is: DROP TABLE employees;

Question **2**
Correct
Mark 10.00 out of 10.00
Flag question

_____offers the ability to query the data and insert, alter, and delete tuples.

1. Transaction Control Language (TCL)
2. Data Control Language (DCL)
3. Data Definition Language (DDL)
4. Data Manipulation Language (DML) ✓

Your answer is correct.
The correct answer is: Data Manipulation Language (DML)

Question **3**
Correct
Mark 10.00 out of 10.00
Flag question

Which of the following SQL clauses is used to filter groups produced by GROUP BY?

1. WHERE
2. HAVING ✓
3. FILTER
4. ORDER BY

Your answer is correct.
The correct answer is: HAVING

Question **4**
Correct
Mark 10.00 out of 10.00
Flag question

GRANT and REVOKE commands belong to which SQL language category?

1. DDL — Data Definition Language
2. DML — Data Manipulation Language
3. TCL — Transaction Control Language
4. DCL — Data Control Language ✓

Your answer is correct.
The correct answer is: DCL — Data Control Language

Question **5**
Correct
Mark 10.00 out of 10.00
Flag question

What is the correct SQL query to retrieve all books whose title contains the word 'Science' anywhere in it?

1. SELECT * FROM books WHERE title = 'Science';
2. SELECT * FROM books WHERE title LIKE 'Science%';
3. SELECT * FROM books WHERE title LIKE '%Science%'; ✓
4. SELECT * FROM books WHERE title IN ('Science');

Your answer is correct.
The correct answer is: SELECT * FROM books WHERE title LIKE '%Science%';

Question **6**
Incorrect
Mark 0.00 out of 10.00
Flag question

How can you change "Priya" into "George" in the "LastName" column in the Users table?

1. UPDATE User SET LastName = ' Priya' INTO LastName = 'George'
2. MODIFY Users SET LastName = ' George ' WHERE LastName = ' Priya' ✗
3. MODIFY Users SET LastName = ' Priya' INTO LastName = ' George l'
4. UPDATE Users SET LastName = ' George ' WHERE LastName = ' Priya'

Your answer is incorrect.

The correct answer is: UPDATE Users SET LastName = ' George ' WHERE LastName = ' Priya'

Question **7**
Incorrect
Mark 0.00 out of 10.00
Flag question

Given the MySQL HR schema, which query correctly displays each DEPARTMENT_NAME along with the COUNT of employees in it, including departments with zero employees?

1. SELECT d.department_name, COUNT(e.employee_id) FROM employees e INNER JOIN departments d ON e.department_id = d.department_id GROUP BY d.department_name;
2. SELECT d.department_name, COUNT(e.employee_id) FROM departments d LEFT JOIN employees e ON d.department_id = e.department_id GROUP BY d.department_name;
3. SELECT d.department_name, COUNT(*) FROM employees e, departments d WHERE e.department_id = d.department_id GROUP BY d.department_name;
4. SELECT department_name, COUNT(*) FROM departments GROUP BY department_name; ✕

Your answer is incorrect.

The correct answer is: SELECT d.department_name, COUNT(e.employee_id) FROM departments d LEFT JOIN employees e ON d.department_id = e.department_id GROUP BY d.department_name;

Question **8**
Correct
Mark 10.00 out of 10.00
Flag question

Find the name of those cities with temperature and condition whose condition is either sunny or cloudy but temperature must be greater than 70.

1. SELECT city, temperature, condition FROM weather WHERE condition = 'sunny'
   AND condition = 'cloudy' OR temperature > 70
2. SELECT city, temperature, condition FROM weather WHERE condition = 'sunny' OR condition = 'cloudy' OR temperature > 70
3. SELECT city, temperature, condition FROM weather WHERE condition = 'sunny' OR condition = 'cloudy' AND temperature > 70 ✓
4. SELECT city, temperature, condition FROM weather WHERE condition = 'sunny' AND condition = 'cloudy' AND temperature > 70

Your answer is correct.

The correct answer is: SELECT city, temperature, condition FROM weather WHERE condition = 'sunny' OR condition = 'cloudy' AND temperature > 70

Question **9**
Correct
Mark 10.00 out of 10.00
Flag question

A trainee writes the following query: SELECT member_id, COUNT(*) FROM borrows GROUP BY member_id HAVING COUNT(*) > 5; What does this query return?

1. All borrow records where the borrow count is greater than 5
2. Member IDs who have borrowed more than 5 books in total ✓
3. The total number of books borrowed across all members
4. Members whose member_id is greater than 5

Your answer is correct.

The correct answer is: Member IDs who have borrowed more than 5 books in total

Question **10**
Correct
Mark 10.00 out of 10.00
Flag question

In SQL, consider the following table and the provided set of data. Which of the following queries selects the respective city name, recorded date, and weather of the cities whose name contains 'i' in it?

City	Recorddate	Temp	Humidity	Weather
Athens	21-Mar-2018	97	89	Sunny
Athens	22-Mar-2018	97	89	Sunny
Chicago	21-Mar-2018	78	98	Rain
Chicago	22-Mar-2018	88	-	Rain
Chicago	23-Mar-2018	75	-	Rain
Paris	22-Mar-2018	62	62	Cloudy
Paris	22-Mar-2018	62	62	Cloudy
Sydney	22-Mar-2018	12	12	Snow

1. Select City, Recorddate, Weather from Cityweather where City LIKE '_i%';
2. Select City, Recorddate, Weather from Cityweather where City LIKE '%i%'; ✓
3. Select City, Recorddate, Weather from Cityweather where City LIKE '_i_';
4. Select City, Recorddate, Weather from Cityweather where City LIKE 'i';

Your answer is correct.

The correct answer is: Select City, Recorddate, Weather from Cityweather where City LIKE '%i%';
